

Ejercicio básico interfaces-eventos / Clase 25 de marzo

Código:

```
package semestre6;
import java.awt.FlowLayout;
import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;
import javax.swing.JButton;
import javax.swing.JFrame;
public class MyFrame extends JFrame {
    JButton btnOk;
    public MyFrame() {
        this.setLayout(new FlowLayout());
        btnOk = new JButton("btnOK");
        btnOk.addActionListener(new miListener());
        this.add(btnOk);

        this.setSize(300, 400);
        this.setLocationRelativeTo(null);
        this.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
        this.setVisible(true);
    }
    class miListener implements ActionListener {
        public void actionPerformed(ActionEvent e) {
            System.out.println("Se oprimió botón");
        }
    }
}

package semestre6;
public class Principal {
    public static void main (String [] args) {
        MyFrame miFrame = new MyFrame();
    }
}
```
